Table EC14: A school voucher system allows parents the option of sending their child to the school of their choice, whether that school is public or private, including both religious and non-religious schools. If this policy were adopted, tax dollars currently allocated to a school district would be allocated to parents in the form of a 'school voucher' to pay partial or full tuition for the child's school. In general, what is your opinion of school voucher systems?

Table EC16: An "education savings account" in K-12 education – often called an ESA – establishes for parents a government-authorized savings account with restricted, but multiple uses for educational purposes. Parents can then use these funds to pay for: school tuition; tutoring; online education programs; therapies for students with special needs; textbooks or other instructional materials; or save for future college expenses. Table EC108: An 'open enrollment' policy in K-12 education allows a student enrolled in public school to select and transfer to a public school of their choice, rather than attending a school based on where they live. A student can be allowed to transfer to a public school in another district (called 'INTER-district'). The policy is based on a first come, first served process until districts are no longer able to accommodate new students. In general, what is your opinion of an open enrollment system?
