

ed CHOICE

THE PUBLIC, PARENTS,
AND K-12 EDUCATION

A National Polling Report

August 2023

KEY FINDINGS

1. Parents want their kids' schools to prioritize values of honesty, respect, responsibility, and kindness. They are more likely to place importance on honesty than non-parents. Parents are least likely to want schools to emphasize competition, prudence, and moderation.
2. Parents most want their children's teachers to be "patient," "experienced," and "organized." They care the least about the gender of the teacher or if they are "strict."
3. For parents, most planning and decision-making on enrolling their children in school takes place in July and August.
4. Over three-fourths of adults have heard "a lot" or "some" about artificial intelligence. Liberal adults, high-income earners and college-educated are the mostly likely to have heard of AI. Rural and low-income adults are the least likely to have heard of it.
5. Sixty percent of adults say they have never used artificial intelligence. Younger adults are most likely to have used it, while older, rural, and female adults are least likely.
6. Half of school parents are concerned about a violent intruder entering their child's school. This proportion is nearly the same as July.
7. The general public and school parents continue to greatly underestimate per-student spending in public schools. The median estimate is \$5,000, but the range of FY2021 state actual per-student expenditures starts with a minimum of \$9,014 and a maximum of \$26,097. The FY21 state average is \$14,295.
8. One-fourth of parents indicate at least one child has ever switched from one school type to another. School switching is highest among private school parents and special education parents. Those who have a child who has switched schools are most likely to indicate that their child experienced excessive stress or anxiety and bullying at their former school compared to other difficulties.
9. Overall support levels for school choice policies remain high among school parents and the general public:
 - Education savings accounts (ESAs) – 76% / 69%
 - School vouchers – 72% / 63%
 - Charter schools – 70% / 61%
 - Open enrollment – 76% / 68%

Methodology

This poll was conducted between August 10-13, 2023 among a sample of 2,259 Adults. The interviews were conducted online and the data were weighted to approximate a target sample of Adults based on gender, educational attainment, age, race, and region. Results based on the full survey have a measure of precision of plus or minus 2.38 percentage points..

SURVEY PROFILE AND DEMOGRAPHICS

School parents are more personally satisfied across all areas of wellbeing compared to non-parents. Both groups continue to be most satisfied with their family relationships and least satisfied with their physical health.

For each of the following, please rate how personally satisfied you are in these areas on a scale from 0 to 10, where 0 means you are not at all satisfied and 10 means you are completely satisfied.

More than 6 out of 10 parents feel “hopeful” about the future, and at least half feel “a sense of purpose,” “optimistic,” “happy,” and “satisfied.”

When thinking about the future, please select which of these words best describes how you feel right now?

School Parents

Agree more with this statement ←

Neutral

→ Agree more with this statement

Fearful
Without Purpose
Unhappy
Dissatisfied
Pessimistic
Dread
I feel overwhelmed
Frustration

More than half of non-parents feel “hopeful” about the future. Over one-fourth feel “frustration,” “dissatisfied,” and “overwhelmed.”

When thinking about the future, please select which of these words best describes how you feel right now?

Non-Parents

Agree more with this statement ←

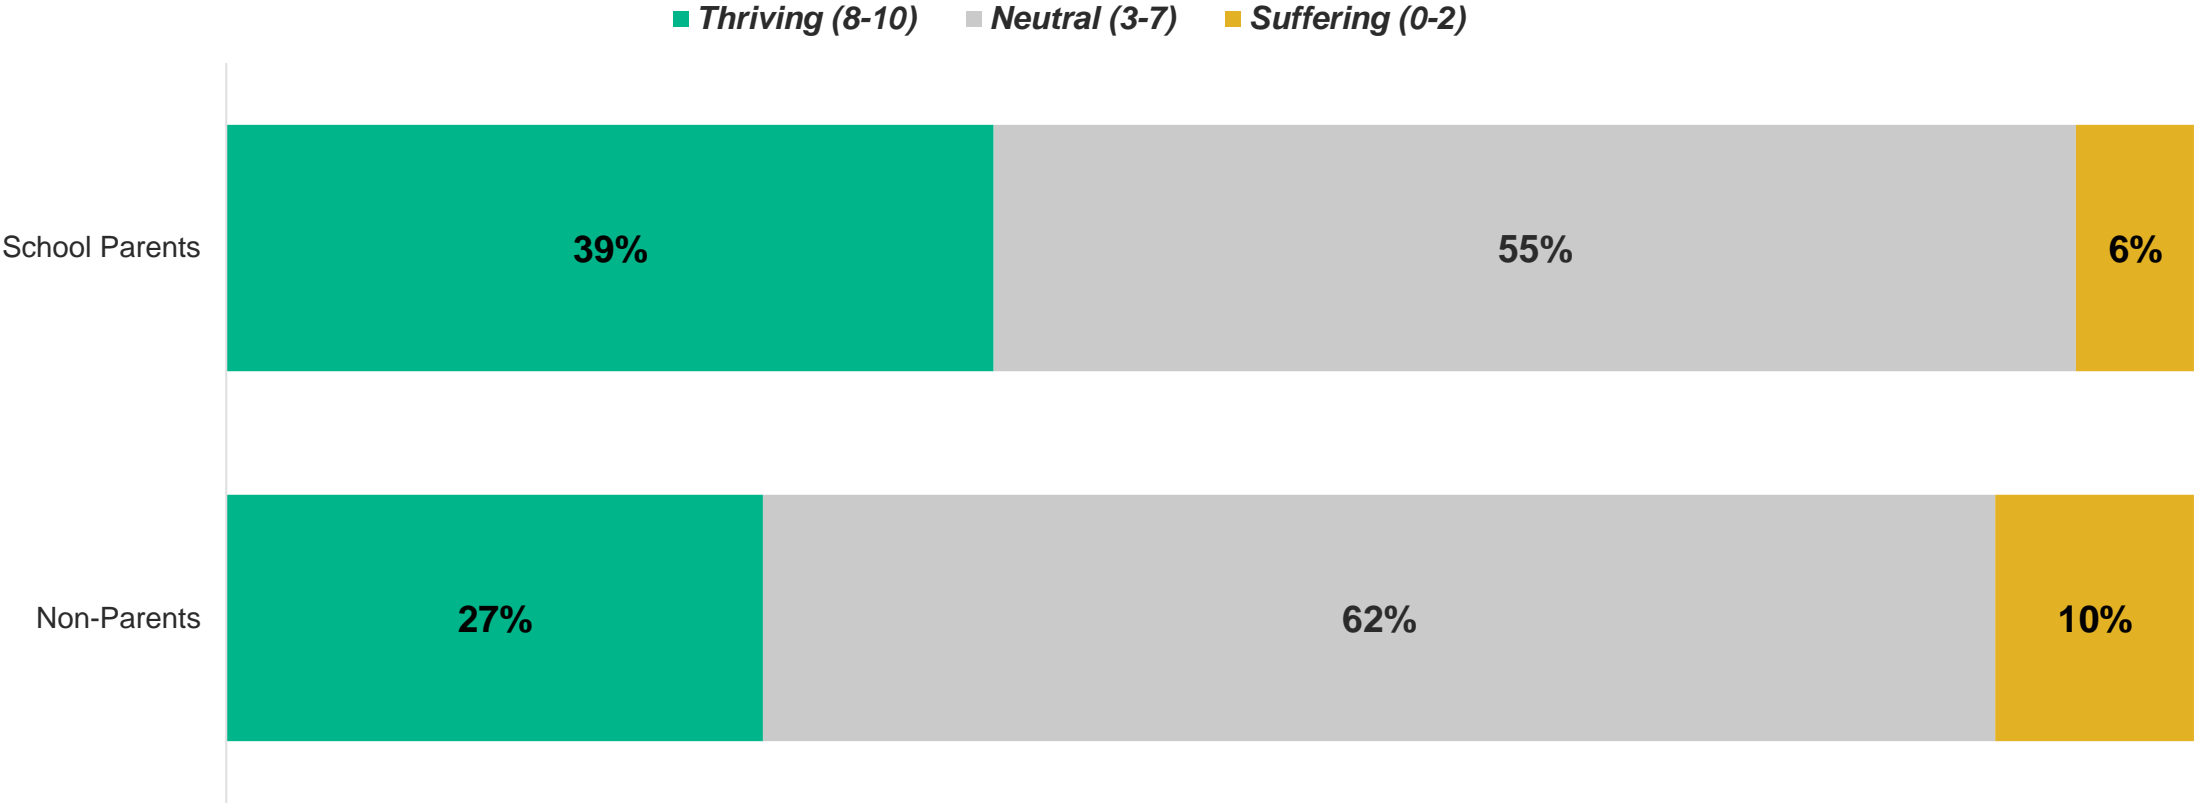

Neutral

→ Agree more with this statement

A higher percentage of school parents report they are “thriving” compared to non-parents.

How do you generally feel about your life on a scale from 0 to 10, where 0 means you feel like you are suffering to a high degree and 10 means you are thriving to a high degree.

SCHOOL CHOICE POLICIES

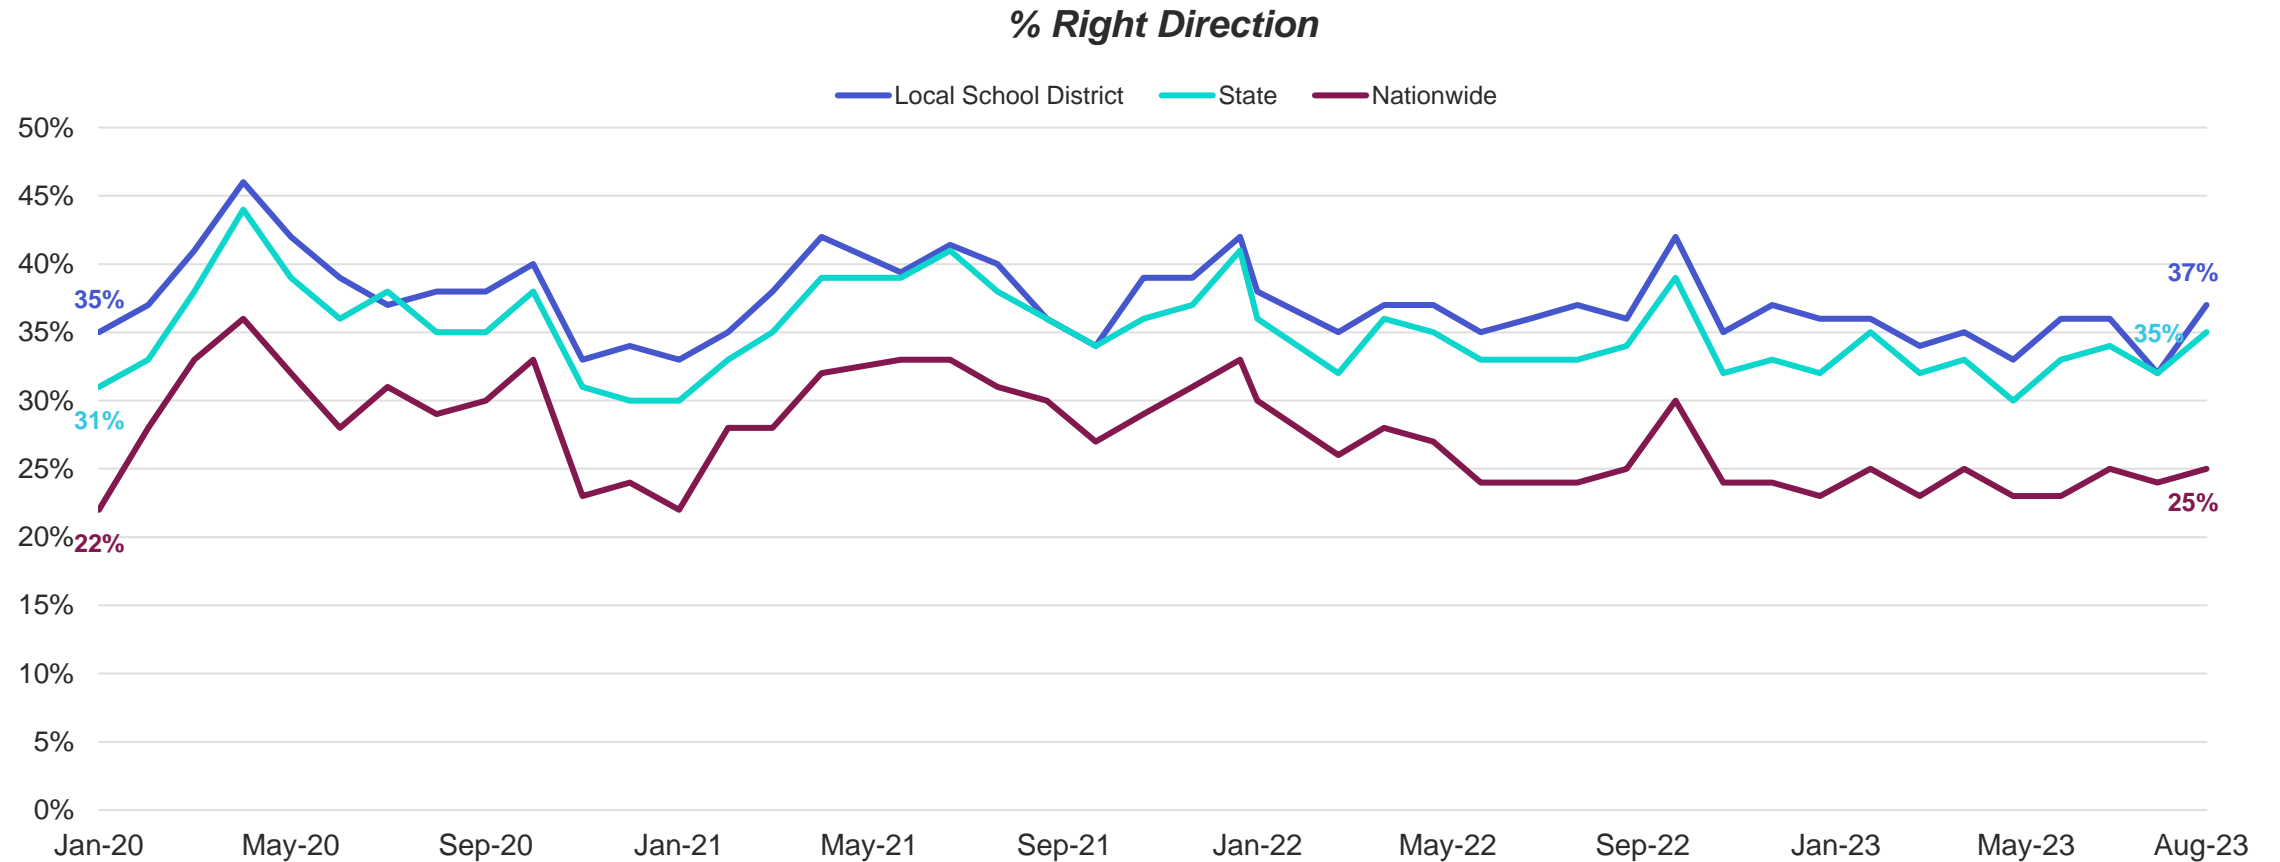

SURVEY PROFILE AND DEMOGRAPHICS

The public's positive views about the direction of K-12 education at the local and state levels have risen since July – especially towards local school districts.

Do you feel things in K-12 Education are generally going in the right direction, or do you feel things have generally gotten off on the wrong track?

All Adults

Parents' opinions have remained fairly stable since the beginning of this year regarding how they see the direction of K-12 education.

Do you feel things in K-12 Education are generally going in the right direction, or do you feel things have generally gotten off on the wrong track?

School Parents

% Right Direction

	School Parents	Non-Parents
Local	55%	29%
State	49%	29%
Nationwide	40%	19%

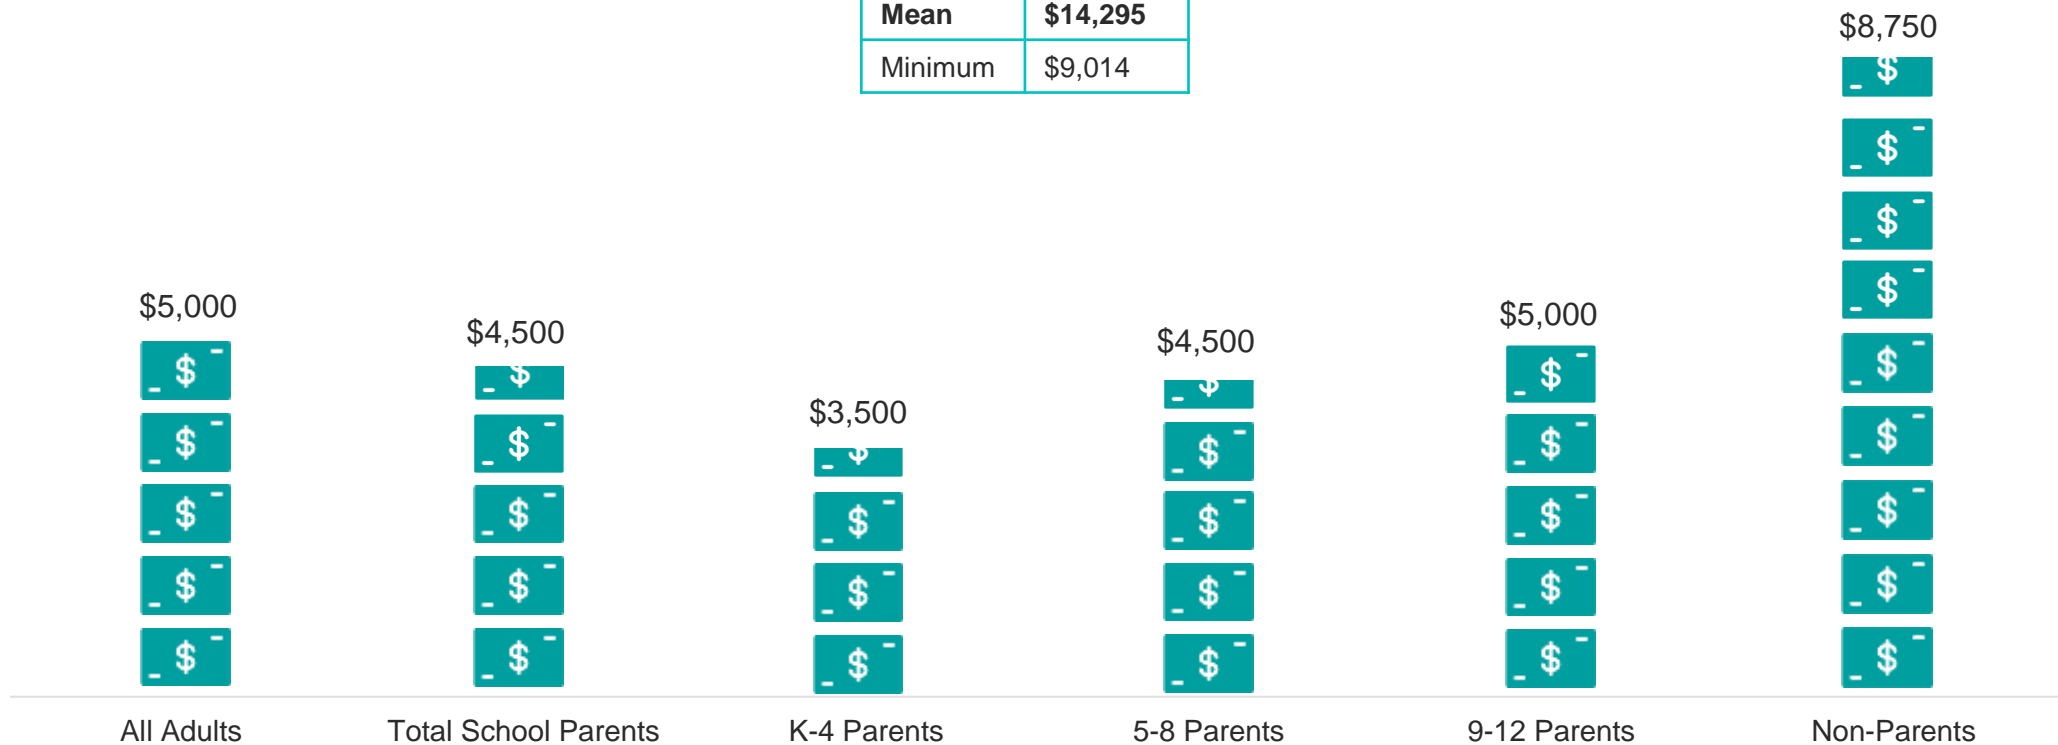

The general public and school parents greatly underestimate per-student spending in public schools.

How much do you think is spent per year on each student in your state's public schools? Your estimate of the state average—to the nearest thousand dollars—will represent the combined expenditures of local, state, and federal governments.

 = \$1,000

Median Estimate

FY21 State Actuals	
Maximum	\$26,097

SURVEY PROFILE AND DEMOGRAPHICS

Roughly half of school parents feel their child's school handles the following four important issues at least very well.

How well do you feel your child's school addresses the following among its students?

School Parents

Total Well
(Extremely + Very Well)

Half of school parents are concerned about a violent intruder entering their child's school. This proportion is nearly the same as July.

How concerned are you about a violent intruder, like a mass shooter, entering your child's/children's school?

School Parents

Total Concern (Extremely + Very Concerned)

Source: Survey conducted August 10, 2023 – August 13, 2023, among U.S. adults

More than half of parents prefer having their child learn at home at least one day per week.

In order to provide the best education for your child/children, what would be your preferred weekly schedule and location between schooling at home with a parent/teacher/tutor, or outside the home?

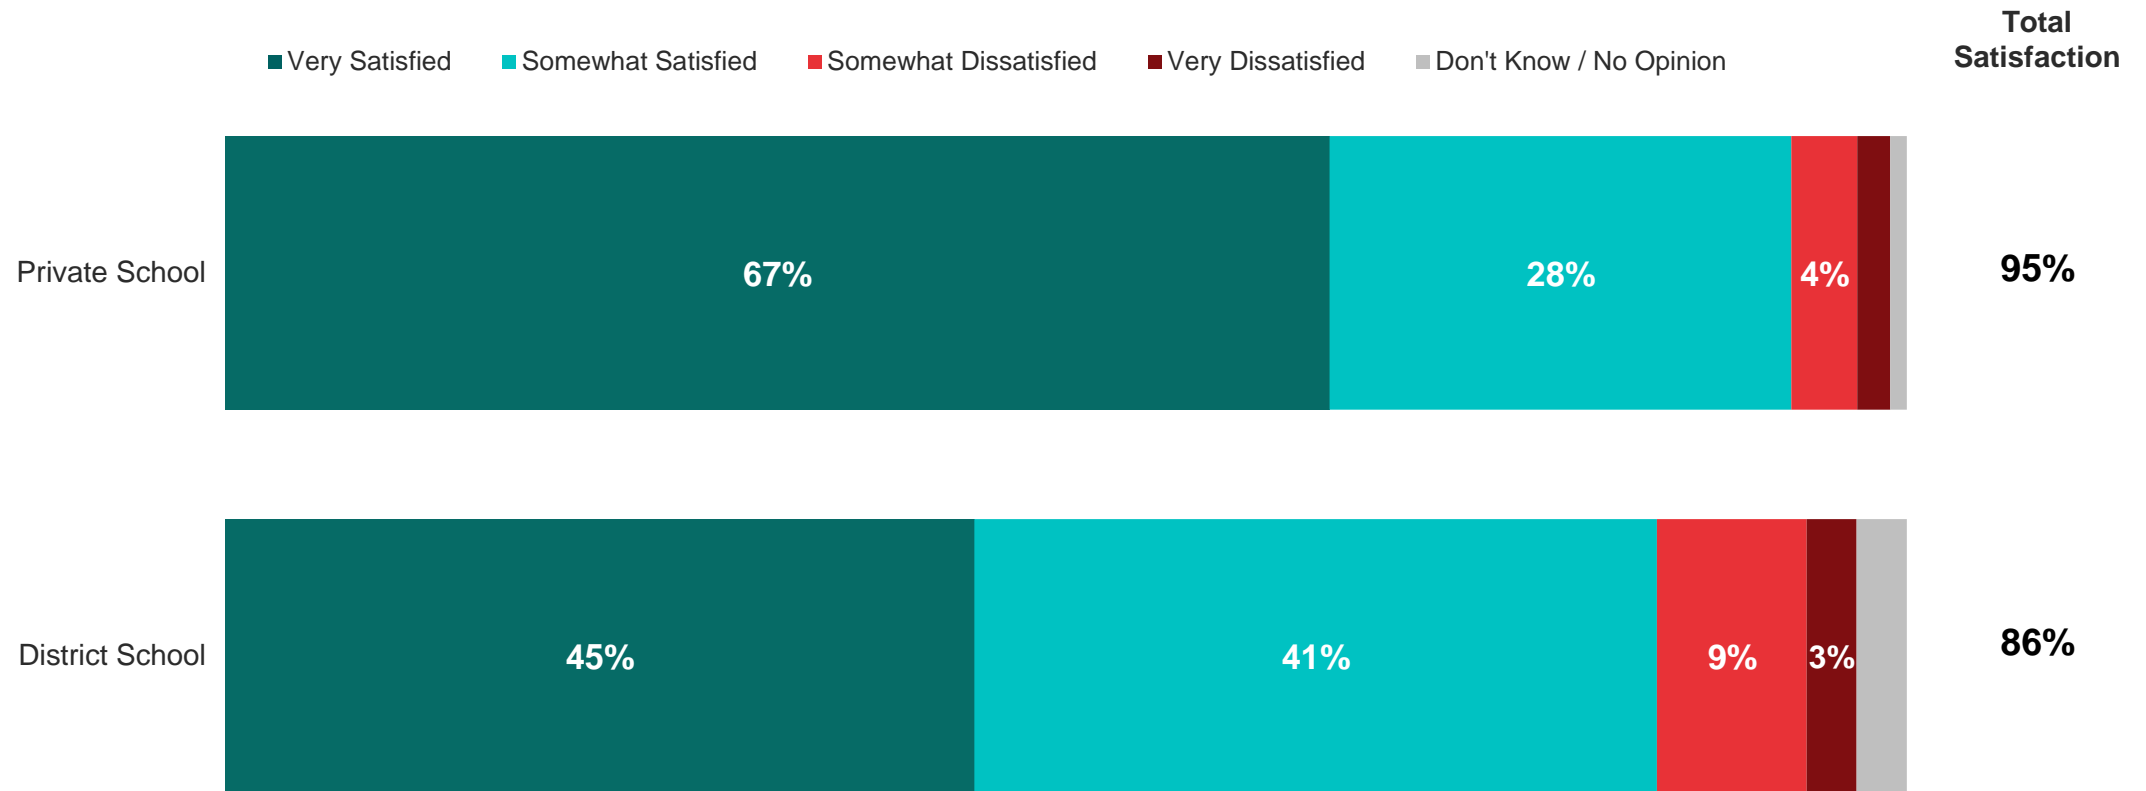

School Parents

Private school parents are much more likely to say that they are ‘very satisfied’ with their child’s/children’s schooling experiences than district school parents.

To what extent are you satisfied or dissatisfied with your child's/children's experiences with the following types of schooling?

School Parents

Parents are consistently more likely to say they are ‘very satisfied’ with private schools than public district schools. Strong district school satisfaction rose sharply from July to August.

To what extent are you satisfied or dissatisfied with your child's/children's experiences with the following types of schooling?

School Parents

% Very Satisfied

Note: Parent groups based on child/children school type attendance in SY23-24.

Location is the main reason why parents enroll their children in their respective school type. Of the reasons listed, parents were least likely to select religion.

Why is your youngest/oldest child enrolled in that school type? Please select the most important reason(s).

School Parents

% Selected

Top 3 Reasons

% Selected

District School Parents		Private School Parents	
Location	54%	Academic quality	56%
Academic quality	27%	Safe environment	52%
Safe environment	26%	Morals/character	44%

Note: Results are composite numbers between those who were asked about their youngest child and those who were asked about their oldest child.

Source: Survey conducted August 10, 2023 – August 13, 2023, among U.S. adults

One-fourth of parents indicate at least one child has ever switched from one school type to another. School switching is highest among private school parents and special education parents.

Besides moving from grade school to middle school or middle school to high school, has your oldest child ever switched from one type of school (or school sector) to another? The various types/sectors include public district schools, public charter schools, private schools, full-time virtual schools, and home schooling.

School Parents

Top % Yes

Private School	45%
Special Education	41%
Special Needs	39%

Bottom % Yes

Hispanic	23%
Black	21%
Rural	18%

Those who have a child who has switched schools are most likely to indicate that their child experienced excessive stress or anxiety and bullying at their former school compared to other difficulties.

Children may encounter different circumstances both inside and outside of school that make it hard for them to achieve academic and personal success. Has your youngest/oldest child experienced any of these difficulties at her/his **former school**? Please select all that apply.

School Parents

Most Frequently Cited Difficulties (%)

Note: Results are composite numbers between those who were asked about their youngest child and those who were asked about their oldest child.
*** Only respondents who indicated that their children have switched schools were asked about their child's former school.**

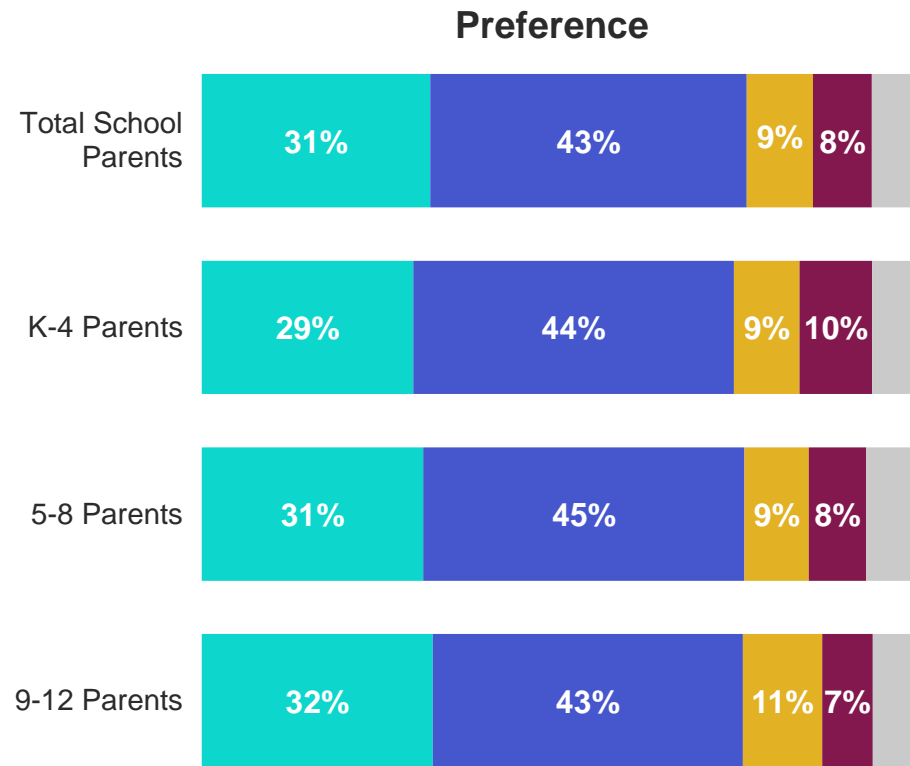

Source: Survey conducted August 10, 2023 – August 13, 2023, among U.S. adults

Parents have a diverse range of schooling preferences. They are slightly more likely to prefer regular public schools over private schools.

If given the option, what type of school would you select in order to obtain the best education for your child?

If given the option, and neither financial costs nor transportation were factors, what type of school would you select in order to obtain the best education for your child?

■ Private School ■ Regular Public School ■ Home School ■ Charter School ■ Don't Know/No Opinion

More than 60 percent of parents have a favorable view of homeschooling. Although overall favorability remained the same as July, strong favorability rose sharply in August.

August 2023

In general, what is your opinion of homeschooling?

School Parents

Total Favorable	62%
Total Unfavorable	29%

Very favorable Somewhat favorable Not that favorable Not at all favorable

Note: In June 2022 through August 2022, we asked half of respondents about their opinions using the previous wording (including a mention of the coronavirus), and half of respondents using new wording (no mention of the coronavirus). The results above reflect data for the new wording.

SCHOOL CHOICE POLICIES

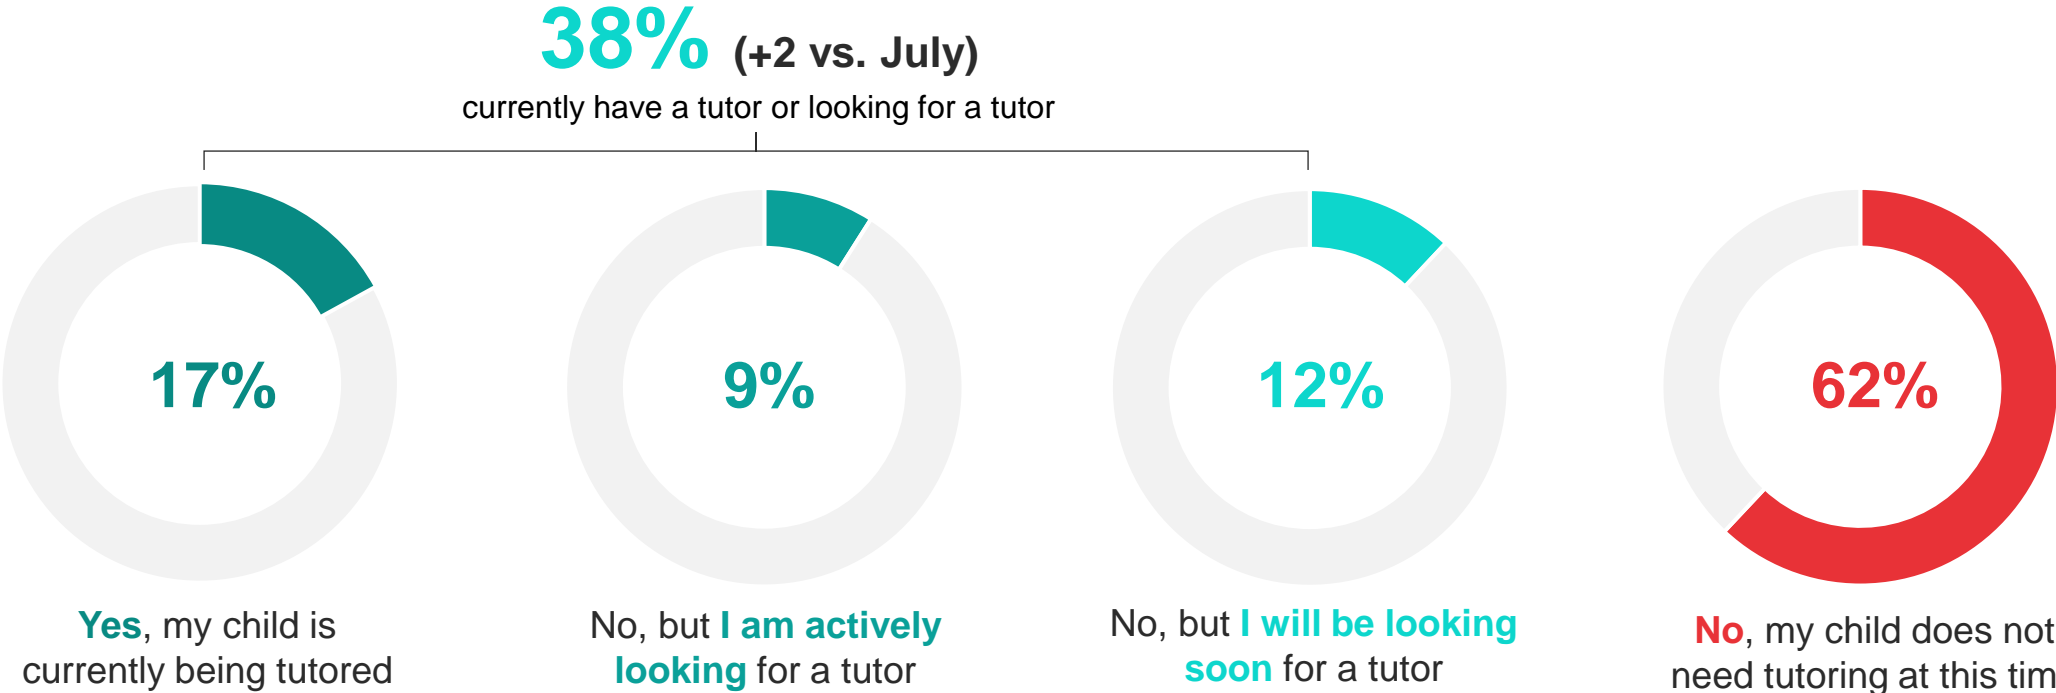

SURVEY PROFILE AND DEMOGRAPHICS

Policy Descriptions Used

Education Savings Accounts

An "education savings account" in K–12 education – often called an ESA – establishes for parents a government-authorized savings account with restricted, but multiple uses for educational purposes. Parents can then use these funds to pay for: school tuition; tutoring; online education programs; therapies for students with special needs; textbooks or other instructional materials; or save for future college expenses.

School Vouchers

A school voucher system allows parents the option of sending their child to the school of their choice, whether that school is public or private, including both religious and non-religious schools. If this policy were adopted, tax dollars currently allocated to a school district would be allocated to parents in the form of a 'school voucher' to pay partial or full tuition for the child's school.

Charter Schools

Charter schools are public schools that have more control over their own budget, staff, and curriculum, and are exempt from many existing public school regulations.

Open Enrollment

An "open enrollment" policy in K-12 education allows a student enrolled in public school to select and transfer to a public school of their choice, rather than attending a school based on where they live. A student can be allowed to transfer to a public school in another district (called "INTER-district"). The policy is based on a first come, first served process until districts are no longer able to accommodate new students.

Support for ESAs, school vouchers, charter schools, and open enrollment is much greater when given a brief description.

All Adults

Source: Survey conducted August 10, 2023 – August 13, 2023, among U.S. adults

In August, support for ESAs was highest among school parents, those identifying as liberal, and Millennials. Support was lowest among rural adults, older adults, and Republicans.

An "education savings account" in K–12 education – often called an ESA – establishes for parents a government-authorized savings account with restricted, but multiple uses for educational purposes. Parents can then use these funds to pay for: school tuition; tutoring; online education programs; therapies for students with special needs; textbooks or other instructional materials; or save for future college expenses. In general, what is your opinion of an ESA system?

ESA Support, Among All Adults

Public Support 69%

Parent groups based on estimated school type attendance for the 2023-2024 school year

Note: Parent groups are not necessarily exclusive, there are cases where a parent could have children enrolled in different school types.

Estimated school type attendance for the 2023-2024 school year

% of Students, Reported by Parents

Methodology Update

In addition to the monthly general population polling, Morning Consult oversamples K-12 school parents, among a national sample of parents living in the United States (including the District of Columbia). The sample is collected via stratified sampling based on race and ethnicity quota targets derived from the U.S. Census Bureau's 2021 American Community Survey. Approximately 800 additional K-12 school parents are interviewed in English each month comprising the oversample. The completed K-12 school parent interviews are weighted to population totals obtained from the 2021 American Community Survey on the following demographic variables: age, gender, region, race/ethnicity, and educational attainment.

Total School Parents	Have at least one child enrolled in grades K-12 for the 2023-2024 school year
Charter School Parents	Have at least one child enrolled in a charter school for the 2023-2024 school year
District/Public School Parents	Have at least one child enrolled in a district/public school for the 2023-2024 school year
Private School Parents	Have at least one child enrolled in a private school for the 2023-2024 school year
Home School Parents	Have at least one child enrolled in home school for the 2023-2024 school year

WHO WE ARE

 **MORNING CONSULT**[®]

Morning Consult is a global data intelligence company delivering insights on what people think in real time.

By surveying tens of thousands across the globe every day, Morning Consult is unmatched in scale and speed: It determines the true measure of what people think and how their decisions impact business, politics and the economy.

Industry leaders rely on Morning Consult's proprietary technology and analysis for real-time intelligence to transform information into a competitive advantage.

 **CHOICE**

EdChoice is a 501(c)(3) nonprofit, nonpartisan organization. Our mission is to advance educational freedom and choice for all as a pathway to successful lives and a stronger society. We are committed to understanding and pursuing a K–12 education ecosystem that empowers every family to choose the learning environment that fits their children's needs best.
