118 **Table EC108a:** *An “open enrollment” policy in K-12 education allows a student enrolled in public school to select and transfer to a public school of their choice, rather than attending a school based on where they live. A student can be allowed to transfer to a public school in another district (called “INTER-district”). The policy is based on a first come, first served process until districts are no longer able to accommodate new students. In general, what is your opinion of an open enrollment system? . . . . .* 259

**Table EC14a:** A school voucher system allows parents the option of sending their child to the school of their choice, whether that school is public or private, including both religious and non-religious schools. If this policy were adopted, tax dollars currently allocated to a school district would be allocated to parents in the form of a 'school voucher' to pay partial or full tuition for the child's school. In general, what is your opinion of school voucher systems?

**Table EC14a:** A school voucher system allows parents the option of sending their child to the school of their choice, whether that school is public or private, including both religious and non-religious schools. If this policy were adopted, tax dollars currently allocated to a school district would be allocated to parents in the form of a 'school voucher' to pay partial or full tuition for the child's school. In general, what is your opinion of school voucher systems?
